

Owner: Sustainable Comfort, Inc. | Location: Worcester, MA | Completion Date: 2017

Project features cosmetic updates inside the units. A heavy focus was on preserving as much existing items as possible like cabinetry, counters, and flooring as to not introduce additional debris into the waste stream. The original siding was protected during construction. To reduce energy costs, insulation was added to the exterior walls above and below grade as well as the attic floor.

Property Management

At SCI we don't just help construct greener buildings, we also want to understand and assist in what it's like to live in them. To that end, each building SCI renovates also gets managed by us. Our property management team works to ensure a healthy and comfortable living situation for each tenant, while linking them to community resources around Worcester.
