

Owner: Sustainable Comfort, Inc. | Location: Worcester, MA | Completion Date: 2018

We take great pride in managing the neighborhoods and housing the people of Worcester we get to call tenants. Our approach to building management comes from a place of preservation, comfort of the families that call it home, efficiency and longevity of the building and neighborhood. We look to build sustainable relationships just as much as buildings. We manage single and multi-family building throughout Worcester communities.

Project included a full renovation of the first-floor unit to add an additional bedroom. Cosmetic upgrades included a fully renovated open concept kitchen with stainless steel appliances and granite countertops, a fully updated bathroom, in-unit laundry, and a modern color scheme throughout. New LED light fixtures and replacement windows were installed to increase energy efficiency.

Project Information

Property Management

At SCI we don't just help construct greener buildings, we also want to understand and assist in what it's like to live in them. To that end, each building SCI renovates also gets managed by us. Our property management team works to ensure a healthy and comfortable living situation for each tenant, while linking them to community resources around Worcester.
